

INSTRUCTION BOOKLET

This booklet provides game operation, bookkeeping, game adjustment, and diagnostic procedures for ALGAR. For installation and special maintenance information refer to the blue-covered game manual. For detailed information refer to Williams Solid State Flipper Maintenance Manual.

SPECIAL CONSIDERATIONS WHEN REPLACING CIRCUIT BOARDS

CPU Board

- 1. For memory protection feature, revision level 6 CPU Boards (batteries located on lower right corner of board) must be used. Revision level 4 CPU Boards equipped with IC14 and IC26 sockets may be used but the memory protection feature is lost.
- Must be equipped with green-labeled ALGAR game ROM and green-labeled flipper ROMs.
- 3. Jumper J3 must be connected and J4 removed.

Sound Board

- 1. Must be equipped with two fuse clips.
- 2. Must be jumpered for ROM operation and be equipped with Sound ROM 4.

Power Supply Board

1. Fuse F4 (10A SB) for flipper solenoids must be installed.

Display Boards

Model C 8363 Master Display and 7-digit Slave Displays required.

LANE CHANGE is a trademark of Williams Electronics. Inc.

GAME OPERATION

*Indicates adjustable features

Game Over Mode - Turn game ON; player scores show zero, high score to date* alternates with player 1 score, player 1 up lamp flashes, game over lamp lights, all playfield lamps except for credit lamp cycle in attract mode.

Credit Posting - Insert coin; knocker sounds, number of credits displayed. If maximum credits* exceeded by coin or high score to date*, credits are posted correctly, coin lockout de-energized until remaining credits are below maximum. No credits may be won and coins are rejected while lockout is energized.

Game Start - Push credit button; start-up tune played, ball served, credit display reduced by one, player 1 up lamp flashes until first scoring switch is made, ball in play shows 1. Pushing credit button before ball 2 displayed allows additional players.

Bonus - Bonus is advanced by making any "K-O-R-A" rollover, drop target when flashing, left inside rollover, or right outlane. The bonus multiplier is advanced by spotting "K-O-R-A" or making the right return gate when lit. Making the eject hole opens and lights the return gate. Making the eject hole or the left inside rollover spots a "K-O-R-A" lamp. The "K-O-R-A" lamps rotate by operating the right flipper (LANE CHANGETM Feature).

Drop Target 3-Banks - Making target stops associated arrow from flashing. Lighting all six arrows steadily scores and advances the Bonus lamps (10,30,50, and 100 times 1,000). Lighting arrows with "100" lit lights eject hole for Extra Ball. Making either 3-bank lights loop shot for 2X.

Loop Shot - Making loop shot for loop gate and loop lane switches lites spinners alternately and scores and advances loop lane lamps (10-60 times 1,000). Making loop shot with "60" lit lights outlanes alternately for Special. The spinners alternate with time and the outlane Specials alternate with each 10 point score.

Chamber - Driving captive ball against Chamber target scores highest flashing value and lights ball shooter to score 50,000 and to release balls in Chamber.

Memory - Partial spotting of "K-O-R-A", drop target arrows, loop lane lamps*, drop target 3-bank bonus*, and bonus multipliers* below 5X.

Extra Ball - Maximum of one* Extra Ball per ball. Making eject hole when lit for Extra Ball awards Extra Ball and resets Drop Target 3-Banks bonus lamps.

Tilts - Ball in play tilted on first closure of Playfield and Ball Roll tilts and third* closure of Plumb Bob. Slam Tilt returns game to game over.

End of Game - Match Digits* appears in ball in play display, *credit awarded for match. Exceeding high score to date awards* three credits. Match, High Score to Date, and Game Over sounds made as appropriate. Balls released from eject holes and are placed on ball ramp before new game can be started.

BOOKKEEPING AND EVALUATION TOTALS

(Functions 01-12)

- 1. In game over mode, set alternate-action switch to AUTO-UP (out) and depress ADVANCE pushbutton. Test 04 is indicated in number of credits display, Function 00 in ball in play display, and game identification in Player 1 display.
- Operate the ADVANCE pushbutton to display each function on the ball in play display (see Table 1) and record each total from Player 1 display. (To reveiw a total that has been advanced past, set alternate-action switch to MANUAL-DOWN (in) and operate the ADVANCE pushbutton.)
- Calculate the following if desired:
 Paid Credits = Function 04 ÷ Function 08
- 4. Turn the game OFF and back ON to return to game over mode.
- To change current High Score to Date to value of Function 13, momentarily depress HIGH SCORE RESET pushbutton.
- 6. To zero Functions 01-11, see page 7

GAME ADJUSTMENT PROCEDURE

(Functions 13-35)

Coin door must be open to change settings.

- 1. In game over mode, set alternate-action switch to AUTO-UP (out) and depress ADVANCE pushbutton. Test 04 is indicated in number of credits display, Function 00 in ball in play display, and game identification in Player 1 display.
- To raise Function number in ball in play display, operate ADVANCE pushbutton with switch set to AUTO-UP (in). To lower Function number operate ADVANCE with it set to MANUAL-DOWN (out).
- 3. With desired Function indicated in ball in play display, raise value in player 1 display by operating credit button with switch set to AUTO-UP (out); lower value by operating credit button with it set to MANUAL-DOWN (in). Value left of Player 1 display is new setting. For values see Table 1 and (for pricing) Table 2.
- 4. Repeat steps 2 and 3 until all required adjustments have been made.
- 5. Turn game OFF and back ON to return to game over mode.
- 6. To restore factory settings and zero audit totals, see page 7.

DIAGNOSTIC PROCEDURES

(Display Digits, Lamp, Solenoid, and Switch Tests)

- In game over mode, set alternate-action switch to MANUAL-DOWN (in) and depress ADVANCE. All displays should go blank.
- 2. Momentarily depress ADVANCE and set switch to AUTO-UP (out). Display Digits test is performed.
- 3. Momentarily depress ADVANCE. Test 01 is indicated on number of credits display and Lamp Test is performed.
- 4. Set toggle switch to MANUAL-DOWN and momentarily depress ADVANCE. Test 02 is indicated on number of credits display and solenoid 01 on the ball in play display; solenoid 01 is pulsed by driver board.
- 5. Operate ADVANCE to pulse each solenoid (see Figure 3).
- 6. Set toggle switch to AUTO-UP and momentarily depress ADVANCE. Test 03 is indicated on number of credits display and stuck switches on ball in play display.
- 7. See Figure 4. Operate switches; switch number is indicated on ball in play display.
- 8. Turn game OFF and back ON to return to game over mode.
- 9. To set up Auto-Cycle Mode (Display Digits, Lamp, and Solenoid Tests) see page 7.

^{*}To be determined.

Notes:

- 1. Functions 00-11 cannot be changed from the coin door; however, Functions 01-11 can be set to zero as described on page 7.
- 2. Total Credits (Function 08) is the sum of Function 04 and as applicable, Functions 05, 06, and 07.
- 3. Total Extra Balls (Function 09) is the sum of the game extra ball feature and Functions 05 and 06, as applicable.
- 4. Current High Score to Date (Function 12) can be changed to the value of the Backup High Score to Date (Function 13) by operating the HIGH SCORE RESET switch while in the game over mode.
- 5. Function 13 may be set to any multiple of 100,000 points. Setting Function 25 to zero with Function 13 set to any score but zero permits the High Score to Date feature to operate but no credits are awarded.
- 6. Functions 14-17 (Replay Scores) may be set to any multiple of 100,000 points. Setting a function to zero disables the replay score point. Always disable the Replay 4 level first, the Replay 3 level second, etc. The replay levels must be set with ascending values.
- 7. Setting Maximum Credits (Function 18) to zero places the game in a free play mode.
- 8. With Function 19 set to 00, Functions 20-24 must be set manually. Refer to Table 2 for seven standard pricing schemes (selected by values of 01-07 for Function 19) and custom pricing values.

through 24 to the values indicated in the chart	in the chart.						

RESETTING AUDIT TOTALS AND ADJUSTMENTS; INITIATING AUTO-CYCLE MODE

- 1. In game over mode, set the alternate-action switch to MANUAL-DOWN (in) and momentarily depress the ADVANCE pushbutton. All displays should go blank.
- 2. Remove the backglass and unlatch and open the insert door.
- 3. Set all switches on the MASTER COMMAND slide switch to OFF (move to the right).
- 4. Set switch on MASTER COMMAND switch to ON (move to left):
 - a. To zero audit totals (Functions 01-11) set switch 8 to ON.
 - b. To restore factory settings and zero audit totals, set switch 7 to ON. Coin Door must remain open to restore factory settings.
 - c. For Auto-Cycle Mode set switch 6 to ON.
- Momentarily depress MASTER COMMAND ENTER pushbutton. The LEDs should blink once.
- 6. a. After zeroing audit totals turn game OFF and ON to return to game over mode.
 - b. After restoring factory settings, turn game OFF and ON twice to return to game over mode.
 - c. To initiate Auto-Cycle Mode, set alternate-action switch to AUTO-UP (out) and momentarily depress the ADVANCE pushbutton. Each cycle of this mode sequences through display digits test, flashes all multiplexed lamps 64 times and pulses each solenoid. To terminate the Auto-Cycle mode and go to game over, turn the game OFF and ON.
